MA STOOL

In Japan the concept of Ma is a philosophical idea about the space between things, a pause necessary in all aspects of life. The stool encourages pause and a calm moment of reflection.

The design is about enhancing the shapes and volume of the negative space, framed in a simple wooden structure. The timeless form meets honest geometric details exposed by contrasting wood grain. The generous curved seat is available with upholstery to match the mood of any interior.

MATERIAL : Solid oak, high density foam

DESIGN : Patryk Koka
